

DASS PROJECT MEET WITH CLIENT -6

Location: online

Date: 25-2-24

Time: 4pm

Attendees: Mayaank,Ketaki,Maitreya,Nitin

Agenda:

- Presenting the Integration of UI and backend to the client
 1. There are a few changes to be made to integrate the UI and backend perfectly.
 2. A rough draft of the same was presented to the client and complete integration was promised by next week.
- Presented the Raspberry PI along with the react app working on it
 1. We presented the web-app on the Raspberry Pi display.
- Discussion on temperature sensor results to be displayed on a web-app
 1. The client agreed on displaying the results on the web-app instead of the android app.
 2. The client asked to make the code as compatible as possible for the android app if implemented later.
- Discussion on server
 1. We told the client that we will be using the MongoDB Atlas server where the data will be sent.
 2. The server link can be changed accordingly later if needed.

Next steps:

- Integrating the UI and the hardware.
- Connection to Atlas server.
- Researching on which temperature sensor to be used
